

Your dreams. Our mission.

Department of Disability Resources

Mass Bay wants students with disabilities to find equal and open access to all of its programs, activities and courses of study.

***Disability Resources* works in close partnership with the administration, the faculty and the students themselves to identify and remove any physical, programmatic or attitudinal barriers that might discourage, frustrate or deny the full participation and academic integration of students with disabilities.**

Students with questions about available teaching and learning accommodations, auxiliary aids, assistive technology, and other academic supports are encouraged to contact a disability specialist in *Disability Resources*.
