

## Computer Science Career Panel | Panelist Joy Adeyemi

**Joy Adeyemi** has almost 20 years of experience in the fashion industry and Product Development Technology. She has an Associates Degree in Patternmaking Technology and Bachelors in Production Management from the Fashion Institute of Technology. She is currently working at TJX as the Manager of Technology and Training where she manages all the hardware and software utilized by the Global Product Development team.

She is responsible for acquiring and implementing technological solutions, training, change management and adoption. Joy represents the Product Development business unit to oversee multimillion dollar IT projects.

She manages the configuration and customizations of the various tools, maintenance and upgrades as well the technology budget. Joy's current role brings together two things she's passionate about, Fashion and Innovation.

She loves to come up with creative ways to solve problems using technology and is a strong believer that creativity can be expressed in many ways as long as you remain true to yourself and your passions.

Joy is also the founder of Joy Enlightens LLC, an organization that works to create a world where people can talk freely about mental health and have access to resources that will enable them live more comfortably and freely. Joy Enlightens focuses on minority groups and believes that representation matters. Mentorship and networks can help us navigate through life's journey. She is also the chair of the Associate Resource Group at TJX for Disabilities as well as leading coalition for Racial Injustice.
