

ATTENTION CLASS OF 2023, 2024 AND 2025 HIGH SCHOOL STUDENTS!

ARE YOU:

- the first in your family to attend college?
AND/OR
- receiving support for food, housing or health care?
AND/OR
- interested in learning about MassBay's STEM programs for college students?

MassBay Community College's STEM Starter Academy is offering selected high school students a 2 week, tuition-free, 3 credit summer 2023 course (ET 111) - iCREAT - where students will be introduced to: coding, robotics, engineering and technology. The course will be taught by a MassBay Engineering faculty member.

Course Description:

Learn robotics this summer while earning college credits! In this hands-on class, you will do mini projects by coding and using electronics to build your knowledge. Once you have progressed and grown these skills you will form a team that will design and create a robot in an interactive and fun environment.

Please note:

- Class meets on MassBay's Wellesley campus from 7/10/23 - 7/21/23, Monday-Thursday, 9 AM - 3 PM. The course will be held on the 3rd floor and the room will not be accessible by elevator in Summer 2023 due to scheduled elevator maintenance. Students are required to take stairs to access the classroom.
