

Industry Recognized Credential: Certified Registered Central Service Technician (CRCST) certification is designed to recognize individuals who have demonstrated the experience, knowledge, and skills necessary to provide competent services as a central service technician.

This 40-Hour refresher course assists busy professionals to prepare for the Certified Registered Central Service Technician (CRCST) examination in a stress free environment. This class will review key topics in central service work flow, anatomy and physiology, medical terminology, infection prevention and control, and safety and decontamination.

Central Processing Certification Exam Prep Course

Why Become Certified

*In recent years, more hospitals & other health care facilities now require central sterile workers to pass certification tests covering topics including microbiology, infection control, and sterilization techniques.

*The stakes are potentially high for contamination. Advanced medical technology has created intricate medical tools that are difficult to clean and sterilize, a situation which experts say could put patients at increased risk for infection.

Fall 2019 Class Details

Class Title: CRCST Exam Prep
